WORK EXPERIENCE

Lead Software Engineer

Timegram

09/2022 - Present

Responsibilities

- Led a team of 6 engineers for a startup SaaS company that created a Time Management Software for freelancers and agencies.
- Conducted code reviews, made architectural decisions, managed engineers under me, guided and mentored them.
- Managed deployments for staging and production environments using DevOps practices where I used GitHub Actions along with Firebase Deployment Service.
- I created the Timegram desktop app for multi platforms including Mac, Win & Linux.
- Responsible for arranging weekly scrum meetings with stakeholders to discuss new features, bugs and feedback.

Senior Software Engineer

10Pearls

08/2020 - 08/2022

Responsibilities

- I was responsible for creating a CI/CD pipeline for multi-environment Nodejs App using GitHub Actions and AWS CodeBuild with AWS CodeDeploy
- I made the above application secured by using HTTPS protocol using AWS Certificate Manager service to its AWS Route53 DNS service
- I worked on Restful API Implementation using Golang for the OAuth mechanism in the client's application & integrated the in Zoom marketplace app
- Implemented Docker & Docker-Compose to enhance developer productivity and efficiency by 20%

Software Engineer

Cloud Coherence

02/2020 - 08/2020

Responsibilities

- Developed a web-based car tracking application using Google Map APIs with a backend on AWS Serverless framework
- Integrated REST APIs with AWS DynamoDB database and connected it with ReactJS & showed it on Dashboard
- Actively worked with DevOps engineer to monitor the costs of AWS lambda executions to control service cost

Associate Software Engineer

Kingdom Vision

09/2018 - 02/2020

Responsibilities

- Led a team of 2 junior Front-end developers for developing that hospital management project
- Collaborated with back-end team to integrate API's for front-end modules Redesign the legacy application using Material and Theme UI
- Responsible for optimizing and fixing the major bugs that occurred on that front-end application
